## Frequently Asked Questions

### Question

Find out the build date for my car?

### Answer

We have an XL spreadsheet to calculate the build date of your C6 from the ORGA number available to download here [- Click Here -](#)

Take the first FIVE (5) digits of the number on the tyre pressure label on the door frame to get the build date for your Citroen

A screenshot of a web-based calculator interface for determining the birthdate of a Citroen C6 from its ORGA number. The interface has a black background with yellow text. At the top, it says 'How to calculate the birthdate of your CITROEN using the found ORGA number'. Below this, there are three columns. The first column is labeled 'Fill in beneath ORGA' and contains a white box with the number '10896'. The second column is labeled 'PRESS Calculate' and contains a grey button with the word 'calculate' in yellow. The third column is labeled 'BIRTHDATE' and contains a white box with the date '08/09/2006'.

My number is 10896CJ so 10896 = 08/09/2006 although the car wasn't registered until September 2007
